Please tick this box if you wish to receive further information from the NSW Government on how you can help combat Climate Change. Please select how you wish to receive information in future: Email Post

Rain is mostly free of micro organisms and pollutants. However, when rainwater is collected and stored it can become contaminated. For this reason, NSW Health does not advise using rainwater for drinking when there's an alternative source of water available. For more information visit www.health.nsw.gov.au.

Application for a Rainwater Tank Rebate (continued)
